

Spot the Difference

What did the climate in Britain used to be like?

What is our climate now?

What might it be like in the future unless we act to prevent climate change?

Choose one of the above questions and design a poster to represent what Britain's climate was like in the past, what it is like now and how it may be in the future.

In your poster you may like to include the following points in order to demonstrate the differences in climate between each period of time:

- Weather
- Houses
- People's clothing
- Animals and Plants
