

Commercial Waste Sack Service

Blue sacks for general refuse and
Orange sacks for recycling

Love the streets you trade in

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

Blue Sacks

Blue sacks are for the removal of general commercial waste. The sacks are approximately 80 ltr in collection capacity. For health and safety reasons, any sacks placed out for collection should **weigh no more than 14 kg**. Most private waste collectors will only accept sacks weighing 10 kg and under.

Benefits of the sack service:

- Ideal for commercial waste producers with limited storage space.
- No restrictions on how many sacks are used – providing they are presented on your scheduled collection day(s). However, please think of the environment and try to minimise the amount of waste generated.
- Charge includes delivery of sacks, collection, disposal costs and Duty of Care documentation.
- Scheduled collection service to meet customer needs and collections can be up to seven days in some locations.

Orange Recycling Sacks

Orange recycling sacks are for the collection of recyclable material. You can place the following items in the orange recycling sack:

- paper (except shredded paper) and card
- glass bottles and jars
- tins and cans
- food and drink cartons (also Tetra Pak)
- empty aerosol cans
- plastic bottles, pots, tubs and trays (rigid plastics) – no lids

Our mixed recycling service removes the need for different recycling containers.

By using the recycling service, you can substantially reduce your waste costs.

If your business or organisation produces or handles waste, you must take all such measures as are reasonable in the circumstances to prevent waste and apply the **Waste Hierarchy** when you transfer waste (Reduce, Re-use, Recycle). Please visit our website for further information about the Waste Hierarchy. <http://www.rbkc.gov.uk/commercialwasteservices/legislation>

Blue and orange sacks are delivered every 13 weeks. If you require more blue or orange sacks you can purchase them at an additional cost.
