

Steel Containers

Blue containers for general waste and orange containers for recycling

Love the streets you trade in

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA

General waste containers

This service is ideal for those businesses who have space on site to move and store these type of containers.

The steel containers are available in either 660 or 1100 litres capacity. The 1100 litre is used more widely in the UK than any other container.

All steel containers come fully fitted with easily operated brake controls on front castors. Galvanised steel construction means they are hard wearing, resistant to fire and have a watertight lid closure to keep out rainwater. All containers are lockable, and extra keys are available on request.

Contracts can be tailored to meet the needs of the individual business with collections available seven days a week in some parts of the borough.

Steel Container Specification

	Width	Depth	Height	Castor Size
660	1205 mm	775 mm	1340 mm	200 mm
1100	1205 mm	980 mm	1340 mm	200 mm

Orange containers for recycling

The mixed recycling service is also available, which is offered at a substantially reduced rate from your ordinary waste collection. We can recycle paper (except shredded paper) and card, food and drink cartons (also Tetra Pak), glass bottles and jars, cans, tins, empty aerosol cans, plastic bottles, pots, tubs and trays (rigid plastics – no lids). A separate fact sheet is available on request.
