

A further point is that the Ansdell Street/South End corner is "blind" and needs to be negotiated with special care from Ansdell Street even now with a low level of traffic. With the development building works, multiple hazards will be created such as to make it a "no-go" route as an exit southwards. However the traffic is managed, it will be detrimental to a large number of residents by obstructing this southern route.

We would urge you to reject this development as being completely inappropriate.

Yours sincerely,
