Butterflies!

It's Spring and many butterflies are beginning to come out of their cocoons and spread their wings! There are also many caterpillars, munching on leaves, building energy to make the transformation into butterflies themselves. Next time you are out for a walk, see if you can find some evidence of these beautiful creatures...

Step One

Go for a walk in parks, woods or even your garden. Look out for the following plants that butterfly caterpillars like. Can you find all four?

Garlic Mustard

Holly

Stinging Nettles

Ivy

Turn to the next page to discover what butterflies you may find...

City of Westminster

THE ROYAL BOROUGH OF
KENSINGTON
AND CHELSEA
