Daisy Chains

Create a bracelet or necklace made from daisies.

Step One

Find some daisies growing in your lawn or at the park and pick them with long stems.

Step Two

Using your thumb nail, make a slit in one of the stems and thread another daisy through it. You have to be careful not to break the stem completely.

Step Three

Now make a slit in the second stem and thread a third daisy through that. Continue doing this until you have a long chain. Then join the first one to the last one to create a loop and you've made a necklace or bracelet (depending how long it is).

Kit List

- Daisies or buttercups

You can also create caterpillars. Pinch the entire stem off one daisy and you will see a hole. Thread a few of these onto the stem of another and you have a furry caterpillar!
