Permit and introductory note LA-PPC

Introductory Note

This introductory note does not form a part of the Permit

The following Permit is issued under Regulation 13 of the Environmental Permitting (England and Wales) Regulations 2016 (as amended) (SI 2016 No 1154) (“the EP Regulations”) to operate an installation carrying out one or more of the activities listed in Schedule 14 of those Regulations, to the extent authorised by the Permit.

The Permit includes conditions that have to be complied with. It should be noted that aspects of the operation of the installation which are not regulated by specific conditions are subject to the Best Available Techniques condition placed in the permit, that the Operator shall use the best available techniques for preventing or, where that is not practical, reducing emissions from the installation.

Please note techniques include both the technology used and the way in which the installation is designed, built, maintained, operated and decommissioned.

Brief description of the installation regulated by this permit

Dry Cleaning Installation as prescribed by Schedule 14 to the Environmental Permitting (England and Wales) Regulations 2016 (as amended) utilising the equipment as detailed in Schedule A of this permit, subject to the Permit conditions.

Superseded Licences/Consents/Permits relating to this installation		
Holder	Reference Number	Date of Issue
Mr I Tasyurdu t/a Isla Dry Cleaners	07/031959	October 2007
Mr S Pinarbasi, Jetlink Ltd	07/031959/2	July 2012
Mr S Pinarbasi, Jetlink Ltd	07/031959/3	September 2013
Sharp Impression Dry Clean Ltd	07/031959/P4	December 2022

Confidentiality

The Permit requires the Operator to provide information to The Royal Borough of Kensington and Chelsea. The Council will place the information onto the public registers in accordance with the requirements of the EP Regulations. If the Operator considers that any information provided is commercially confidential, it may apply to The Royal Borough of Kensington and Chelsea to have such information withheld from the register as provided in the EP Regulations. To enable The Royal Borough of Kensington and Chelsea to determine whether the information is commercially confidential, the Operator should clearly identify the information in question and should specify clear and precise reasons.

Variations to the permit

Your Attention is drawn to the Variation Notification Procedure condition in the permit. This Permit may be varied in the future. If at any time the activity or any aspect of the activity regulated by the following conditions changes such that the conditions no longer reflect the activity and require alteration, the Regulator should be contacted.

Surrender of the permit

Where an Operator intends to cease the operation of an installation (in whole or in part) the regulator should be informed in writing, such notification must include the information specified in regulation 24, or in accordance with Regulation 25 of the EP Regulations for Permits to which Regulation 24 does not apply.

Permit and introductory note LA-PPC

Transfer of the permit or part of the permit

Before the Permit can be wholly or partially transferred to another person, a joint application to transfer the Permit has to be made by both the existing and proposed holders, in accordance with Regulation 21 of the EP Regulations. A transfer will be allowed unless the Authority considers that the proposed holder will not be the person who will have control over the operation of the installation or will not ensure compliance with the conditions of the transferred Permit.

Responsibility under workplace health and safety legislation

This Permit is given in relation to the requirements of the EP regulations. It must not be taken to replace any responsibilities you may have under Workplace Health and Safety legislation.

Appeal against permit conditions

Anyone who is aggrieved by the conditions attached to a Permit can appeal to the Appropriate Authority, (Secretary of State for the Environment, Food and Rural Affairs, in England and the Welsh Ministers in Wales). Appeals must be made in accordance with the requirements of Regulation 31 and Schedule 6 of the EP Regulations.

Appeals should be received by the Secretary of State for Environment, Food and Rural Affairs or the Welsh Ministers at the following addresses:

The Planning Inspectorate
Environment Team, Major and Specialist Casework
Room 4/04 Kite Wing
Temple Quay House
2 The Square
Temple Quay
Bristol BS1 6PN

Or for appeals in Wales:

The Planning Inspectorate
Crown Buildings
Cathays Park
CARDIFF
CF10 3NQ

Please Note

An appeal brought under Regulation 31 (1) (b), (c) and Schedule 6, in relation to the conditions in a permit will not suspend the effect of the conditions appealed against; the conditions must still be complied with.

In determining an appeal against one or more conditions, the Act allows the Secretary of State in addition to quash any of the other conditions not subject to the appeal and to direct the local authority either to vary any of these other conditions or to add new conditions.

Our enforcement of this permit will be in accordance with the Regulators' Compliance Code. A copy is on the Business, Innovation and Skills Department website: www.gov.uk/government/publications/regulators-code.

End of introductory note

**Permit issued under the Environmental Permitting
(England and Wales) Regulations 2016 (as amended)**

Permit Reference: 07/031959/P5

The Royal Borough of Kensington & Chelsea (the Regulator) in exercise of its powers under Regulation 13(1) of the Environmental Permitting Regulations (England and Wales) 2016 (as amended) (SI 2016 No. 1154) hereby permits:

Sharp Impression Dry Clean Ltd (The Operator)

Whose Principal office is:

**14 Earls Court Road
London
W8 6EA**

Company Number: 11717089

To operate an installation at:

**Isla Dry Cleaners
14 Earls Court Road
London
W8 6EA**

Description of the installation regulated by this permit

Dry Cleaning Installation as prescribed by Schedule 14 to the Environmental Permitting (England and Wales) Regulations 2016 (as amended) utilising the equipment as detailed in Schedule A and within the boundaries of this permit, subject to the following conditions.

Signed

**Rebecca Brown
Authorised to sign on behalf of
The Royal Borough of Kensington and Chelsea**

Dated

23rd February 2024

PERMIT CONDITIONS

THE PERMITTED INSTALLATION

1. If the Operator proposes to make a change in the operation of the installation, he must, at least 14 days before making the change, notify the Regulator in writing. The notification must contain a description of the proposed change in operation. It is not necessary to make such a notification if an application to vary this permit has been made and the application contains a description of the proposed change. In this condition "change in operation" means a change in the nature or functioning, or an extension, of the installation, which may have consequences for the environment.
2. Operations must be carried out in such a manner that no more than 20 grams of solvent per kilogram of product cleaned and dried shall be emitted as measured and reported annually. The 20 grams includes all organic solvents used within the installation e.g. dry cleaning solvent, water-proofing solutions and spot cleaning solutions.
3. A weekly inventory of solvent usage, product cleaned and solvent waste sent for recovery or disposal shall be maintained and held on site for inspection by the Regulator for at least 12 months. Further, the Operator should retain records of solvent purchased for at least 12 months. Note: The solvent management balance sheets for dry cleaning installations in the Appendices can be used to demonstrate compliance with conditions (1) and (2) (above).
4. In the case of abnormal emissions, malfunction or breakdown leading to abnormal emissions the Operator shall:
 - investigate immediately and undertake corrective action; adjust the activity to minimise those emissions; **and**
 - adjust the activity to minimise those emissions; **and**
 - promptly record the events and actions taken.
 - In this condition abnormal emission will include any detectable solvent smell other than in the area of the dry cleaning machine
5. In cases of non-compliance causing immediate danger to human health, or threatens to cause an immediate significant adverse effect upon the environment, operation of the activity shall be suspended; and the Regulator informed within 24 hours.
6. The dry cleaning machine loading door shall be closed before the start-up of the machine, and kept closed at all times through the drying and cleaning cycle.
 - All machines installed after 19 May 2005 shall have interlocks to prevent start-up of the machine until the loading door is closed and to prevent opening of the loading door until the machine cycle has finished and the cage has stopped rotating.
 - All machines installed after 19 May 2005 shall have interlocks to automatically shut down the machine under any of the following conditions: cooling water shortage, failure of the cooling ability of the still condenser, failure of the cooling ability of the refrigeration system or failure in the machine heating system resulting in the inability to dry the load.
7. *This condition does not apply, unless the Regulator varies the permit. Such variation is likely following a spill.*

All new, and substantially refurbished machines, shall have a spillage tray with a volume greater than 110% of the volume of the largest single tank within the machine.

(Explanatory note that is not part of the permit conditions - This condition, or the lack of it, does not remove the need to comply with Health & Safety recommendations relating to the fitting of spill trays to existing machines.)

8. A copy of the following shall be sent to the Council at the frequency given below:

Information to be sent to the Council	Frequency at which information should be sent <i>On the date stipulated by the Regulator</i>
Inventory sheets for the completed year. <i>(Collated into the annual inventory sheet in schedule C)</i>	Once a year by or on on January 31st

Schedule B

Monthly Inventory Sheet: All Installations

Site: _____ Solvent: _____
Machine _____ Month & Year _____

Week Starting (date)

--	--	--	--	--	--

Weight of work processed (kg)

						Monthly Total (A)
--	--	--	--	--	--	--------------------------

Solvent Added (litres)

						Monthly Total (B)
--	--	--	--	--	--	--------------------------

Solvent sent for disposal

						Monthly Total
Total waste drum volume (litres)						(C)
Still cleaning correction factor: 0.15 for powder filter rake out, or 0.35 for ecological filter rake out, or 0.5 for pump out						(D)

Compliance this month

Table A

Weight cleaned (kg) (A)	Solvent added (litres) (B)	Solvent disposed (litres) (C x D = E)	Net solvent use (litres) (B - E = F)	Consumption (kg/litres) (A ÷ F = G)	On Target? ** (Yes/No)

** The monthly result should only be used to provide a guide as to the performance of the machine. Solvent input and waste recovered will vary each month, affecting the Consumption (G).

Where:

- Perchloroethylene is used, if G > 80kg/l = on target
- Siloxane is used, if G > 48.5kg/l = on target
- Hydrocarbon are used, if G > 48.5 kg/l = on target

Notes:

Schedule B

Annual Inventory Sheet: All installations

Site _____ Year: _____
 Machine _____ Solvent: _____

Monthly Compliance:
 (complete "Table 1" with results from "Table A" from monthly inventory sheet)

Table 1

Month	Weight Cleaned (kg)	Solvent Added (litres)	Solvent Disposed (litres)	Net solvent use (litres)	Consumption (kg/litres)
Total	(A)	(B)	(C)	(D)	

Annual Compliance

Spot Cleaning correction factor (litres)*	(E)	
Corrected solvent input (litres)	(D + E = F)	

Solvent efficiency (kgs/litres)	(A ÷ F = G)	
Specific Gravity of Solvent being used: Perchloroethylene : 1600g/l Siloxane: 970g/l HCS 970g/l	(H)	
Solvent emission (g/kg)	(H ÷ G = I)	

Have you met the requirement of the regulations (Is ("I") <20g/kg?)	
---	--

*Spot Cleaning Correction Factor – A figure of 6.25 litres per annum should be used as the spot cleaning factor, whichever solvent is used for cleaning purposes
