Leaf Pictures

Leaves come in all shapes, sizes, colours and textures. Can you create some beautiful leaf creatures?

Explore your garden or nearest public open space, collecting a selection of leaves ready to create your creatures. Take care not to damage the plants.

Step One

Lay your leaves out on a flat surface to create the main body of your creature. Layer the leaves to add details. You can use scissors to help if you'd like. Take inspiration from real creatures or use your imagination. Take care if creating outside as they may blow away.

Step Two

Once happy with your creation, you could take a photo whilst it looks at its best. Now see how many other creatures you can make out of the same leaves.

Step Three

If you want to display your creature, you could stick the leaves down on some paper. To keep them for longer you could press the leaves between paper and under a heavy book for about a week before you use them.

Step Four

Kit List

- Leaves, small twigs
- Paper & scissors
- Glue or double sided tape
