Type 600

.60m RECEIVE-ONLY OFFSET ANTENNA SYSTEM

FEATURES

- One-piece compression-molded offset reflector.
- Sturdy AZ/EL mount with elevation scale.
- Single bolt fine elevation adjustment.
- Single galvanized 1.00" O.D. feed support leg.
- Factory pre-assembled mount.
- Cadmium-plated hardware for maximum corrosion resistance.
- Available with a wide variety of Ku-Band feeds.

The Channel Master® Type 600 Offset Antenna is a rugged commercial grade product suitable for the most demanding applications. The reflector is compression-molded for strength and surface accuracy. Molded into the rear of the reflector is a network of support ribs which not only strengthens the antenna, but also helps to sustain its critical parabolic shape.

The AZ/EL mount is constructed from heavy-gauge steel to provide a rigid support to the reflector. Four heavy-duty lockdown bolts secure the mount to any 2.38" O.D. mast and prevent slippage in high winds. A specially-formulated powder paint process offers excellent protection from weather-related corrosion.

NON-PENETRATING ROOF MOUNTS

Channel Master® non-penetrating roof mounts have been specifically designed for our line of offset reflectors. Mechanically tested and field proven, these fully adjustable mounts meet the performance requirements of demanding commercial applications.

The non-penetrating roof mounts are designed to be used on a flat roof and have provisions for concrete block ballast. The mount components are powder-coated, pre-galvanized steel, with the exception of the 52" x 52" base (see below). All hardware is cadmium-plated with a polymer coating for excellent corrosion resistance.

Model 611617401 has a 2.38" O.D. mast and a 36" x 36" base, which is designed for the .60m and .75m antennas. This model can also be used with .90m and 1.0m antennas with a "hybrid" 2.38" AZ/EL cap when higher windloads are not expected.

Models 611652302/03 utilize a 3.00" O.D. mast and a 52" x 52" base and are designed for the .90m, 1.0m, and 1.2m antennas. Model 611652302 has a powder-coated steel base, while Model 611652303 incorporates a hot-dip galvanized base for extreme environmental conditions.
