

Applications LB/00/2814 and CA/00/2815
Enforcement Case E/01/2044/C
File Note

1. Applications of some age and are for 3 signs which is not what has been erected on site, which is one sign. Design officer does approve of the use of a backboard, recommending that the sign should be fixed direct to the stonework fascia. However this could present problems for the stone fascia which may end up having to be repaired. See Marks and Spencer sign – new stonework in places.
2. It is not considered that the existing sign is so detrimental to the listed building as to warrant enforcement action. It is therefore proposed to withdraw both applications and close the enforcement case as it is not considered expedient to take further action.
