Dear Sir/Madam

Please find enclosed 4 copies of relevant drawings and application forms for the above application.

The grouping of the 3 buildings (32, 32A and 32B St Lawrence Crescent) are situated on the corner of St Lawrence and Chesterton Road.

The site currently consist of a central brick structure 3 stories high which is known as 32 St Lawrence Terrace. Flanked each side are 2 one-storey constructions 32B and 32A St Lawrence Terrace.

The buildings are the sole ownership of my client including the rear yard and out buildings.

All the ground floor has an existing retail use however 32A hss been vacant for over 10 years.

The rear yard belongs to 32A with the tenants of 32B and 32 using the toilet facilities in the yard. Currently the yard is in a derelict state with a disused shed and storage.

The 1<sup>st</sup> and 2<sup>nd</sup> floors of 32 contain 2 two-bedroom flats which are rented out on short contracts by my client.

The proposed development seeks to develop the site in three areas:-

- 1 To extend the shop at 32A into the yard in order to make the shop more desirable for letting.

This would extend into the rear yard which is currently flanked by part 3-storey sheer walls each side. The existing toilet facilities will be incorporated into the new extension and within the properties of 32B and 32.

I understand the council is keen to promote the provision of living accommodation in the area. It is therefore my client's proposal to construct a studio flat at first floor above the proposed ground floor extension. Like the ground floor the sides of the flat are flanked by the existing party walls and therefore there is no

problem regarding privacy or overlooking. The new flat will be served via the existing staircase.

The roof of the studio flat will form a roof terrace to the existing second floor flat. Again as it will be flanked each side there will be privacy. The roof terrace would create a landscape terrace garden forming an amenity which is currently absent from the site.

Another studio flat is proposed within the existing attic space. By extending the existing stairs up and forming 2 dormers to the rear of the roof it is possible to create a comfortable one-bedroom studio flat.

The impact of the dormers is reduced in 3 ways:-

- 1 Chamfering the edge to reduce the height of the site wall.
- 2 Finishing the external walls in tiling to match existing.
- 3 Situating them to the rear of the roof in order to minimise the positions in the street where these will be visible.
- 4 By forming a dormer on each side this will replicate the symmetry.,

It is also proposed to form a small round window to the front elevation within 2 conservation style velux windows in the roof slope.

I hope the above is self-explanatory but please do not hesitate to contact me should you have any queries.

Yours faithfully

S. Sergiou
