

23

5. Your attention is drawn to the British Standards Code of Practice for Demolition, and the Environmental Protection Act 1990 relating to nuisances, the observation of which should considerably reduce the risks and nuisance inherent in demolition work (particularly in relation to fire hazards arising from the practice of burning materials on site) both to operatives on site and to the general public. (131)

Yours faithfully,

**Michael J. French**  
Executive Director, Planning and Conservation
