

# Managing traffic

## Managing traffic in the borough

We are one of the smallest boroughs in London yet the most densely populated local authority area in England and Wales. This creates heavy traffic that need careful management.

We are committed to:

- reducing traffic congestion
- improving safety and well-being
- encouraging active and sustainable modes of travel

Our approach to traffic management includes:

- offering a range of cycling incentives
- working with local schools and businesses to develop their travel plans
- supporting car clubs
- encouraging electric vehicle use

## Parking

Parking is an emotive issue in central London. Our dedicated parking team ensures our parking system is fair to everybody. We review our parking and loading restrictions in response to requests from residents and businesses.

Read about latest changes in our [Traffic Management Orders](#). [1]
