

Bevington Road open space

Green space in Bevington Road

In 2015 we collaborated with North Kensington Streetscape Advisory Group to identify open space at the southern end of Bevington Road. We felt there was great potential to:

- create a green and pleasant environment
- improve the public realm

Improvement plans

Following consultation with the local community we are implementing an improvement plan. Key elements include:

- natural porphyry paving with granite kerbs
- new trees and shrubs
- new planters around the paved area to prevent vehicle access
