

# Nature at home

Experience the magic of  
Forest School from home!

## Flower Press

Create your own collection.  
Suitable for nursery to KS2  
children.

### Step One

After a windy day, collect some different tree leaves and petals from the ground.

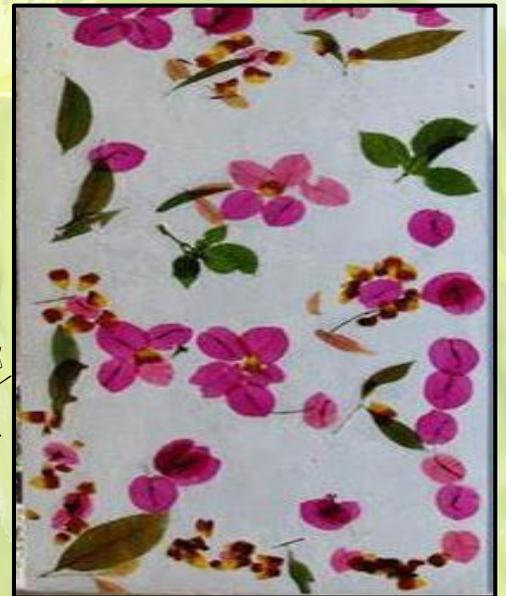

### Step Two

Lay them out on the kitchen paper on a flat surface. Put another layer of kitchen paper on top.

Put the sheets under some heavy books for a week or so to dry out the leaves and petals.

### Step Three

Once dried out you can make a collage out of the leaves and petals or mount them on paper in a folder to make a record of what you have found like a scientist.
