Subject: Please tighten control over basement applications

Dear Planning Policy Dept,

I would like to support the proposal that the Council exercises more control over basement developments, restricting proposals to a single level and to a maximum of 50% of the area of the property.

I understand there is a form that you ask people to return to you to indicate their support, however I am away and this form is not accessible by blackberry.

Accordingly, please accept this email reply as confirmation that I support your tighter control over basement applications.

Thank you,

Michele Gorgodian
