

**Underpinning under listed buildings - examples of foundation repairs to listed buildings by underpinning**

The table below gives examples of foundation repair work by traditional underpinning completed on listed buildings. This is a small selection and there will be many more examples.

In all cases the buildings were experiencing movement and the early stages of structural issues with their foundations. If left unremedied the condition would have worsened to the eventual point of structural lack of integrity and the need for demolition.

The underpinning work work preserves the heritage asset and ensures future structural integrity.

46 Holland Park Avenue W11 3QY - RBKC

14 Holland Park W11 3TH - RBKC

16 Holland Park W11 3TH - RBKC

33 Eaton Square SW1W 9D - RBKC
