Dalgarno Ward Profile

THE ROYAL BOROUGH OF
KENSINGTON AND CHELSEA
Introduction

The Census occurs once every ten years, the most recent of which fell on 27 March 2011. This report gives a summary of Census data for Dalgarno ward.

In 2014, each ward in Kensington and Chelsea had changes made to its ward boundaries meaning that no Census data exists specifically for these new wards by the Office for National Statistics. To alleviate the data gap, this summary uses Output Areas (OAs) as the building blocks for the new wards. OAs are the smallest Census geography, containing circa 150 residents. OAs are allocated using a best fit model, therefore ensure that these profiles are treated, and the numbers they contain, as being illustrative only.

For ease of use Census data has been subdivided into three distinct themes:

- Who we are...
Population, ethnic group, country of birth, passports held, religion, health

- How we live...
Marital status, living arrangements, household composition, accommodation, tenure, car or van availability, overcrowding

- What we do...
Economic activity, hours worked, qualifications and students, industry, occupation, unpaid care

Disclaimer: All data relates to the Census 2011 figures released by the ONS and all figures are rounded to one decimal place in the text and to one significant figure in the charts.

Figure 18.

Area Classification

Area classifications group together geographic areas according to key characteristics common to the population in that grouping. These groupings are called clusters, and are derived using 2011 Census data. Dalgarno is defined as "**Endeavouring Ethnic Mix**" with a 37.5 per cent majority falling into this category (ranked 18th). The borough on average is classified as "**Aspiring and Affluent**" with a 72.2 per cent coverage.
Endeavouring Ethnic Mix: a higher proportion of people who belong to the Bangladeshi ethnic but a lower proportion of those in Pakistani and Indian ethnic groups. There is a higher proportion of people who were born in the old EU countries. Households are more likely to live in flats and to privately rent. Overcrowding is also more prevalent, and public transport more commonly used to get to work.
